

## The Metro Chicago, Illinois

***Project Type:*** Multi-Use/Mid Rise

***Architect:*** VOA Associates

***Construction Management:*** Construction Realty

***Construction Cost:*** \$25,535,397.00

The Metro is a next generation building combining singular form with multi-faceted function. This is a building that melds gracefully into existing architectural landscape while being truly distinctive in appearance. All residences have nine-foot ceilings, quality oak flooring, granite kitchen countertops, custom wood cabinets, gas fireplaces, sumptuous master baths, oversized balconies or terraces and vaulted ceilings in the penthouses. Other features not visible include expertly engineered sound proofing, state-of-the-art fire protection, and pre-wiring for cable and high speed internet access. Additional amenities include ample private storage, secured, heated parking, fitness center and a tree landscaped exterior. In this non-story building, the views from the residences are simply spectacular with the lights of the Chicago skyline dancing magically in the background.
